JOGGER**
WORKS

**HEAD-TO-TOE
PROTECTION**

2023

**ENGINEERED
IN EUROPE**

Welcome

First and foremost, we would like to thank you for your interest in Safety Jogger.

Each year, our **family-owned company Cortina** - which Safety Jogger is a part of - sells more than 30 million pairs of shoes and apparel worldwide. We are proud that Safety Jogger can count on this international and future-proof organization to offer you a wide range of innovative safety products.

In fact, **innovation** has always been our main driver. As our slogan 'solutions for every workplace' states, we aim to be a **one-stop solution** for personal protective equipment. First, we did so by strongly focusing on **footwear** and **accessories** for each person's needs. This year and in the coming years, we are exponentially growing our offer by adding **workwear** and **head protection** as well. The result? **A complete range that protects from head to toe.** Anyone, anywhere and anytime.

In addition to innovation, our mission is to become a **leading PPE provider in terms of ecology and sustainability.** We want to ensure that we not only protect our consumers, but also the planet and environment they live in. This by using recycled materials in our products and taking on our social responsibility.

Last but not least, our goal is to **offer a noticeable added value to our partners.** With unique benefits such as an always-in-stock guarantee and an unparalleled supply chain. With a clear focus on quality, comfort and competitive prices. And with digital tools to make your life easier, powerful partnerships to maximize our brand's visibility and in-depth marketing support to boost your sales.

The entire Safety Jogger team is committed to providing you with the best customer service and making your business successful.

Remember: we are more than happy to be of service!

Wim Vanderschueren & Tom Gybels
Founder & Managing Director

1950

Start of a small shoe factory in Belgium, named **Cortina**

1960

Import of footwear from **Italy**, Europe

1980

One of the first European companies to start **importing from the Far East and China**

1981

Launch of the **Cortina safety footwear collection**

1990

Registration of the **Safety Jogger brand name in Benelux**

2000

Launch of the **Safety Jogger brand in Europe**

2007

Selling of the first pair of Safety Jogger footwear in **Asia**

2011

Development and manufacturing of the **Safety Jogger work gloves collection**

2013

Acquisition of '**Oxypas**', the n°1 brand for medical and professional footwear

2014

Launch of Safety Jogger in **Russia**

2015

Safety Jogger goes **USA**

2017

Acquisition of the leading German safety footwear brand '**Maxguard**'

2017

Traction by **Shoes for Crews**

2018

Launch of the **lightweight and tactical collection**

2020

Acquisition of '**Tiger Grip**', market leader in slip-resistant and safety **overshoes**

2022

Launch of **workwear and head protection**.

More than 70 years of experience

At Safety Jogger, we have more than 70 years of experience in developing footwear and apparel. What started as a small factory in Belgium called **Cortina** quickly grew into a global business that consists of many brands - with **Safety Jogger** being one of the main ones.

Today, we are a **leading brand of certified personal protective equipment**, with a presence in more than **130 markets**. As a multcategory brand, we develop a complete range of footwear, overshoes, workwear, head protection, gloves and accessories. This to ensure safety for all professions in **industrial, professional and tactical** industries.

**Global
presence**
in +130 countries

Protection from head to toe

Safety Jogger WORKS.

To provide protective **solutions for anyone, anywhere and anytime.**

What started with certified safety shoes, socks and gloves has now expanded into a **complete range of personal protective equipment.** Because we want to meet every consumer's need. We want to provide total protection against work hazards. We want to offer a **one-stop solution from head to toe.**

All products are engineered in **Europe** by top specialists with in-depth product knowledge and hundreds of years of accumulated experience. We extensively **test** our products in our **own lab** to guarantee they meet the highest norms and standards.

The result? An evergreen, modern and complete collection for various industries that is qualitative yet affordable. One that protects the entire body: from our well-known **footwear, socks and gloves** to our brand-new **workwear, eyewear, head protection, ear protection and respirators.**

Our promise towards our customers

- ✓ One-stop solution from head to toe
- ✓ Always in stock
- ✓ Immediate delivery
- ✓ Strong distribution channels
- ✓ Excellent customer support
- ✓ Online dealer platform
- ✓ Elaborate marketing support
- ✓ E-learning platform
- ✓ Worldwide availability
- ✓ Good quality at a competitive price

Vision & mission

Vision

Delivering constant innovation in PPE by utilizing advanced technology and over 70 years of development experience.

Mission

Offering head-to-toe protection for every workplace, renowned for its modern design, competitive pricing and excellent quality.

Ambition

Building the best professional PPE company in the world, with unparalleled speed to market, innovation and value creation.

WORLDWIDE CERTIFICATES

We are present worldwide and deliver certified products that meet global safety standards.

No matter what country you live in.
No matter which safety product you are interested in.
We provide the right certifications for your region!

Need a specific certificate for your area that we don't have yet? Let us know and we'll make it happen!

WE WALK THE TALK!

Here at Safety Jogger, we want to contribute to a more sustainable world. Not only in the creation of our shoes, but also by acknowledging our social responsibility.

Did you know that we adopt the Global Recycling Standard for most of our products? This international, voluntary standard supports our intention of using more recycled materials and aligns with our focus on ethical and responsible production.

Products with the GRS label contain at least 20% of certified recycled materials.

We also contribute to a greener world by using components that are made of recycled materials and carry the GRS label:

- ✓ Footbeds
- ✓ Linings

Reduce, reuse, recycle

In addition, we strive towards a complete range of products with:

- ✓ Recycled upper materials
- ✓ Outsoles made with recycled content
- ✓ Laces

Each pair of **Morris** and **Ecofitz** contains no less than 10-12 PET bottles worth of ocean waste and is therefore GRS certified. That way, these safety shoes not only protect your feet, but also our planet.

ECOFITZ

 **lining**
mesh with yarn made from recycled plastic

 **threads**
100% recycled

 **laces**
made from 95% recycled plastic

MORRIS

 **reinforcements/
back counter**
100% recycled materials

 **comfortable
footbed**
100% recycled materials

 **upper**
knitwear with yarn made from 90% recycled plastic

PU

PU or polyurethane is a foamed material that is used in 2 different compositions. **Single** or **mono-density PU**, which is an outsole with uniform density. And **double-density PU** or **PU/PU**, which is a combination of a softer PU midsole and a more compact PU outsole.

Features of single-density PU:

- ✓ Good flexibility, shock absorption, abrasion and slip resistance
- ✓ Heat resistant up to +/- 120°C
- ✓ Resistant to oil and fuels, but not to strong acids
- ✓ Mainly used in light application areas

Features of PU/PU:

- ✓ Same benefits as single-density PU
- ✓ The softer PU midsole provides extra impact absorption and wearing comfort
- ✓ The compact PU outsole improves the cut resistance
- ✓ Wide range of applications, except for strong acids and extremely hot or cold conditions

TPU

TPU or thermoplastic polyurethane is also PU, but with a higher density. It is used only for outsoles and is often translucent.

Features:

- ✓ Flexible, sturdy and resistant to abrasion
- ✓ Great slip resistance, comparable to rubber
- ✓ More durable than PU outsoles
- ✓ Better flexibility in cold conditions
- ✓ Less resistant to high temperatures

Rubber

Rubber can be used as a single-rubber outsole or in combination with a softer midsole made of PU, EVA or other materials.

Features:

- ✓ High slip and heat resistance (up to 300°C)
- ✓ Cut resistant and resistant to oil, fuel and most acids
- ✓ Very durable and long-lasting
- ✓ Less shock absorbing and abrasion resistant
- ✓ Heavier and less flexible than PU or TPU

An outsole for every surface

TOE CAPS

A protective toe cap made according to the European or ASTM standard will protect feet **from impact and compression injury**, regardless of the material.

But what exactly is the difference between the materials and what could be the best choice for you?

Toe caps, protection from the inside out

Steel toe cap

- ✓ Made from **steel only**
- ✓ Most **traditional choice**
- ✓ **Naturally stronger** than all other materials, resulting in a thinner layer that offers more space around your toes
- ✓ **Cheaper** compared to composite toe caps
- ✓ **Protects** your toes from basically every impact & compression injury
- ✓ **Conducts** cold, heat and electricity

Composite toe cap

- ✓ Made from **non-metal materials** such as fiberglass, carbon fibre or plastics
- ✓ **Up to 30% lighter than steel toe caps**, reducing stress and fatigue in legs
- ✓ **Does not conduct** heat or cold in extreme temperatures, ensuring extra comfort
- ✓ **Metal free**, thus practical for electrical hazardous environments or workplaces with metal detectors

Aluminium toe cap

- ✓ Also known as **alloy toes**
- ✓ Made from **lightweight materials** (30-50% lighter than steel)
- ✓ **Not metal free**

Nanocarbon toe cap

- ✓ Made from an innovative **carbon nanofiber material**
- ✓ **Lightest** (50% lighter than steel and 40% lighter than composite) and **most advanced** safety toe cap
- ✓ **Thinner** and therefore a solution for the bulkier composite toe
- ✓ **Does not conduct** heat or cold
- ✓ Metal-free, non-magnetic and antistatic material

Did you know...

that slipping and tripping are the main causes of accidents on the work floor?

SLIP RESISTANCE

Slipping, tripping and falling are the main causes of accidents in the workplace. Therefore, slip-resistant soles are one of the most important features of safety footwear.

However, you can only be 100% sure your safety footwear is slip resistant when it has an SRA, SRB or SRC rating. But what is the difference?

SRA

SRA slip-resistant soles are tested on a ceramic tile wetted with a diluted soap solution.

+

SRB

SRB slip-resistant soles are tested on smooth steel covered with glycerol.

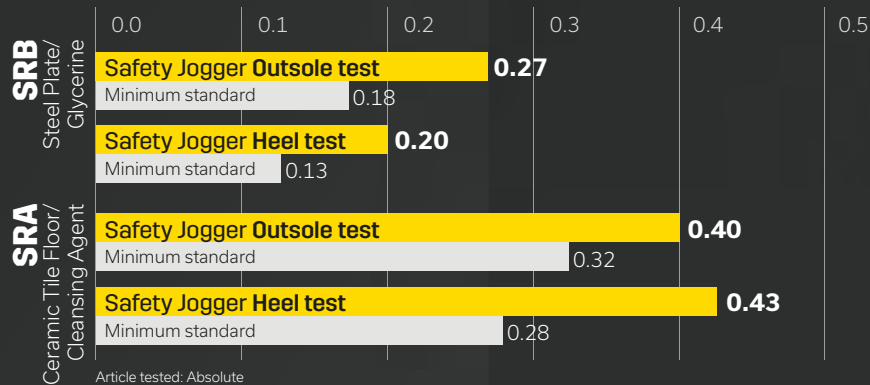

=

SRC

SRC slip-resistant soles pass both SRA and SRB slip resistance tests.

Or in short: if the sole passes the SRA and SRB tests, it gets the SRC standard. You will notice that almost every Safety Jogger shoe is provided with an **SRC slip-resistant sole**. Safety Jogger's slip-resistant soles pass both tests with glance and **exceed the minimum standards by far**.

CERTIFIED ORTHOPEDIC SOLUTIONS

How does it work?

1 - The customer **receives a Safety Jogger shoe** that is suitable for orthopedic footbed and alterations.

2 - The customer goes to the **foot specialist**.

3 - The foot specialist is **registered** at the NeskrID platform or easily **creates an account** via neskrID.com.

4 - The foot specialist **analyses the feet, takes measurements and forwards the data** to NeskrID.

5 - NeskrID **produces** according to these measurements and current regulations.

6 - The foot specialist **receives the soles** and **organizes the check-up and delivery**.

The custom-designed footbed will have the **same properties and certifications** as the replaced footbed, assuring that your safety shoe still meets all requirements.

Are you in need of an orthopedic footbeds? In the case of safety footwear, this can be a bit tricky. To comply with all safety regulations, the footbed also needs to be certified by us, in accordance with a particular model. This means that you cannot simply replace it with any other (certified) footbed.

That's why we offer a brand-new solution that answers to the **customer's individual needs**: NESKRID.

NeskrID is a Dutch supplier specialized in certified orthopedic soles for safety footwear. All solutions are developed through a unique combination of expertise in orthopedics and professional footwear, which means that they are adjusted to the individual foot while still meeting the official regulations.

Worldwide service

NeskrID offers full service on a global level. No matter where you are located, having a NeskrID account will give you access to all solutions.

Outstanding **comfort**, **support** and **performance** with every step

Our removable Safety Jogger foam footbed is included in most of our footwear.

No matter how many hours on the job, how many steps a day or how uneven the surface is that you are walking on: our foam footbeds put an end to aching and uncomfortable feet at the end of your working day.

The SJ foam footbed ensures:

- ✓ All-day **comfort**
- ✓ A **lightweight** design
- ✓ Enhanced **breathability** to keep feet cool
- ✓ Moisture absorption to keep feet **dry**
- ✓ **Arch support** to ensure extra comfort throughout the day
- ✓ **Optimum shock absorption** in heel and forefoot to prevent fatigue
- ✓ An extra layer of **cushioning**
- ✓ **Conductivity** of electrostatic discharge (ESD) standards
- ✓ **Antibacterial** characteristics to remove odor

Made of
recycled materials

Even the best shoes won't deliver on their promised comfort if you don't wear **the right socks.**

Your feet contain more sweat glands than any other part of the body. That's why we developed our high-performing and sustainable bamboo socks. Made from **77% bamboo fiber**, they keep your feet dry and guarantee unparalleled comfort that lasts all day.

Benefits of the bamboo fiber:

Engineered with different functional zones to deliver high-tech comfort:

✓ **Eco friendly**

Bamboo requires no pesticides to grow and only 1/3 of water compared to cotton

✓ **Sustainable**

Bamboo can grow 4 feet per day and replenishes itself when harvested

✓ **Extra absorbent**

Wicks moisture away from the skin and keeps your feet dry

✓ **Thermoregulating**

Cool in summer and warm in winter

✓ **Antibacterial**

Does not retain odors

✓ **Incredibly soft**

Offers unparalleled comfort and extra cushioning

✓ **Hypoallergenic**

A solution for those with sensitive skin

✓ **Biodegradable**

A greener material that will return to the earth

**No safety shoe without the right
certifications**

QUALITY IS KEY

By developing in our own facilities and inspecting all materials in our specialized test laboratory, we can monitor every aspect of our products. From design and construction to the final distribution. This way, all products are manufactured according to Safety Jogger's quality standards.

As a result, we are certified by the most known institutes in the industry and can guarantee our products meet the highest norms when it comes to protection.

Innovation in every step:

- ✓ Specialized **test lab**
- ✓ Advanced **R&D facilities** in Europe and Asia
- ✓ Experienced **footwear professionals**
- ✓ Use of the latest **footwear technology**
- ✓ **Certified** worldwide
- ✓ Modern **on-site sample room**
- ✓ State-of-the-art **machinery**
- ✓ Continuous **investments** in innovation and development

Safety Jogger's safety footwear is certified in accordance with the global standard for safety footwear.

TECHNICAL FEATURES

Toe protection

Protects your feet from impact & compression injuries

Slip resistance

The outsole ensures maximum grip on both wet & dry surfaces and is compliant with the slip-resistance standard

Closed heel

Provides your feet with extra support and protection

Antistatic

Prevents a build-up of static electrical charges that can damage electronic components and ensures that they are effectively discharged

Oil and fuel resistance

The outsole is resistant to oil and fuel

Heel energy absorption

Reduces the impact of jumping or running and ensures long-lasting comfort

Water-repellent upper

Protects your shoes and feet from water and dirt while still allowing them to breathe

Puncture resistance

Steel & woven fabric midsoles prevent any sharp objects from entering the sole of your shoe

Cleated outsole

Protrusions on the sole of the shoe provide additional traction on a soft or slippery surface

SAFETY JOGGER

INDUSTRIAL

INDUSTRIAL

Safety Jogger Industrial offers a wide selection of safety footwear that covers the specific needs of industrial environments, such as the logistics, automotive & construction industry. This certified range combines trendy designs and all-day comfort with all the safety features needed to protect against hazards and injuries. Keeping all workers safe on the job.

EN ISO 20345

LIGHT

APPLICATION

Light application footwear is engineered for dry environments. Wearers of this type of footwear typically work indoors, on relatively even floors and are not stepping into any harmful liquids. Examples of light application industries are logistics, assembly or even catering.

MEDIUM

APPLICATION

Medium application footwear is engineered for both wet and dry environments with more robust requirements. People wearing this type of footwear usually have to carry out tougher jobs or kneeling activities. These shoes and boots can be used both indoors and outdoors and are therefore more all-round, but less fit for extreme circumstances. Examples of medium application industries are light construction, oils and gas industry or utility.

HEAVY

APPLICATION

Heavy application footwear is engineered for dirty, muddy and rocky environments. People wearing this type of footwear mostly work outdoors and have to walk on uneven surfaces that demand high stability and protection of their feet. Examples of heavy application industries are road construction, building construction, or even mining.

AHX (EXTENDED ANTI HYDROLOSIS) POLYURETHANE

The outsoles of this footwear are made with AHX (extended Anti Hydrolosis) Polyurethane, a sustainable material that features anti-hydrolysis technology. Hydrolysis is the crumbling of the PU sole after a few years and is accelerated by warmth and humidity. AHX Polyurethane makes the sole stronger, increases the resistance against hydrolysis and is particularly useful in tropical climates, as it doesn't let heat affect its performance.

EH (ELECTRICAL HAZARD)

EH footwear has such a high electrical resistance that it creates a solid barrier between you and the ground and does not allow electrical current to travel through the body. As it is fully isolating, EH footwear protects from harmful electrical current and is the ideal solution for environments with a high risk of electrocution.

SHOES FOR CREWS

These safety shoes have been upgraded with high-performance traction by Shoes for Crews, an industry leader in revolutionary anti-slip soles. Working together with Shoes for Crews enables us to manufacture the best of both worlds in a safety shoe and elevate the performance of our slip-resistant footwear.

FOOD

These shoes are specifically engineered with the food industry in mind. They are stain resistant, easy to clean and SRC slip resistant, ensuring food and beverage workers to stay on their feet in all kinds of slippery or greasy situations.

Benefits of the TLS closing

- ✓ Fast, effective and **time efficient**
- ✓ Easy to close with **one hand**
- ✓ **Uniform pressure** distribution
- ✓ Easy **adjustable** for a **precision fit**
- ✓ Retains tension
- ✓ Prevents from tripping and entanglement
- ✓ Extremely **strong, durable** and **hard wearing**

Safety with
a twist

TLS (TWIST LOCK SYSTEM)

Goodbye traditional laces that require two-handed operation. Hello Twist Lock System! With Safety Jogger's TLS closure, you simply need to twist and lock for a faster, safer and easier precision fit. This innovative closure allows you to quickly tighten and loosen your footwear with one hand and in all conditions, even when wearing safety gloves.

Don't lose time tightening your laces.
Just twist and lock!

WORKWEAR

WORKWEAR

Here at Safety Jogger, our workwear just works...

Safety Jogger workwear equals both tough and good-looking garments, adaptable to the individual needs of each professional.

We continuously roll up our sleeves to provide workwear that works for everyone, whether you're on or off duty. Workwear that combines high-quality fabrics with extremely durable materials. Workwear that is comfortable and a pleasure to wear in all kinds of settings. Workwear that combines multiple functional features with a noticeable modern look.

Or in other words:
garments that will fit each professional, each activity and each environment like a glove.

... on the future

Did you know that we also use recycled fabrics for our workwear?

Using **recycled materials** takes the pressure off the world by:

- ✓ Reducing the amount of waste.
- ✓ Conserving the world's natural resources such as water and minerals.
- ✓ Preventing pollution because fewer raw materials are needed.

... on protection

Our workwear meets several norms and standards:

EN ISO 20471
High-visibility workwear

Makes the wearer visible from all directions at day, dusk and night. This protective clothing is required by law for anyone working on roads and construction sites. High-visibility workwear is categorized into three different classes that describe how well the product can make the user visible.

	Class 1	Class 2	Class 3
Fluorescent material	0,14 m ²	0,50 m ²	0,80 m ²
Reflective material	0,10 m ²	0,13 m ²	0,20 m ²

EN 14058
Insulated workwear

Protects the wearer from cold environments, characterized by temperatures > -5 °C.

EN 343
Waterproof workwear

Protects against rain, snow, fog and ground moisture. The material and seams are tested for resistance to water penetration and vapor.

EN 14404
Workwear with knee protectors

Protects worker's knees when working in a kneeling position. The kneepads are tested for shock absorption, pressure distribution, resistance to sharp or pointed objects and various other requirements.

... On comfort

Comfort, flexibility and freedom of movement. the key features of all our work garments. That's why even in our **basic models**, we use

stretch materials for supreme comfort. Our **more advanced models**, in turn, have 4-way stretch in key areas. **4-way stretch** is stretchable in all directions and recovers both width and lengthwise, moving with your body and providing an unbeatable level of performance.

Wearing comfort that goes beyond a good fit

In addition to stretch fabrics, the design and material choices of our garments also contribute to the high level of comfort:

- ✓ Comfortable and soft materials
- ✓ Breathable zones in strategic places
- ✓ Lightweight fabrics that do not weigh you down
- ✓ Excellent wicking and drying performance in smart spots
- ✓ Strategically placed pockets and accessories that do not hinder

Softshell: a jacket essential

Need to maintain an ideal body temperature while being protected from the cold, wind and rain? Softshell holds the answer!

Softshell indicates a **category of technical fabrics that ensure maximum comfort in changing weather** and are particularly suitable for **physical outdoor activities**.

Why? Because generally, the more waterproof a garment is, the less breathable. Also more moisture will get trapped inside. Softshell is created specifically to **facilitate the release of moisture and regulate body temperature**.

To guarantee excellent performance, softshell jackets consist of **three layers of different materials**:

- ✓ **Outer layer** in **water-repellent** polyester, offering protection against bad weather
- ✓ **Middle layer** in a **breathable membrane**, allowing moisture to escape
- ✓ **Inner layer** made of **microfleece**, ensuring good thermal insulation

By connecting these three layers, we get a very light, elastic and soft material that provides numerous benefits:

- ✓ Flexible
- ✓ Breathable
- ✓ Insulating
- ✓ Water repellent
- ✓ Wind resistant

A construction worker is seen from behind, climbing a silver metal extension ladder on a roof. The worker is wearing a dark grey long-sleeved shirt, bright yellow high-visibility trousers with reflective strips, and dark work shoes. The background shows a clear blue sky and the white and grey structure of a building under construction. A large yellow diagonal shape is on the left side of the image, and thin yellow lines are scattered across the scene.

A man with curly hair and a beard is wearing a black, heavy-duty jacket with a hood. He is standing in a lumber yard, surrounded by stacks of wood on blue metal shelving. The word "JACKETS" is written in large, bold, yellow capital letters across the middle of the image. The background is slightly blurred, showing more stacks of wood and the structure of the yard. A yellow graphic element, a large triangle, is on the left side of the image. A thin yellow line outlines a shape on the right side of the image.

All-round polo shirt with a feminine fit made of breathable and quick-drying fabrics

EU XS-L - 60% Cotton, 40% Polyester, piqué, 210 g/m²

The perfect all-rounder for whatever your day holds. This modern polo shirt not only looks great in a wide range of settings, but also feels incredibly comfortable and cool thanks to the quick-drying fabric and breathable mesh zones. A must-have piece for the professional wardrobe. Feminine fit.

- Mesh zones under armpits
- Mesh zone in neck
- Two-color design

✓ **Comfort fit**

✓ **Highly breathable mesh fabric**

✓ **Good wicking and drying behavior**

RED

BLK

TBL

A person wearing a black hoodie and dark shorts is standing in a barn, pouring feed from a white bucket into a rusty green wheelbarrow. A cow is visible in the background behind a metal railing. The scene is set on a dirt floor with hay scattered around. A yellow graphic element is on the left side of the image, and a yellow line outlines the person's legs and feet.

SOCKS

SJ SOCK

Safety footwear is mostly made of tough and harsh materials to protect your feet in the best way possible. Therefore, it's essential to wear high-quality socks in your shoes and boots. Our socks are engineered to offer enhanced comfort and support while working. The elasticated and reinforced ankle seamlessly follows the anatomic shape of each foot. This way, you will not be bothered by annoying folds.

Material	75 cotton - 23% polyester - 2% elastic
Sizes	EU 39/42 - 43/47
	UK 6/8 - 9/12
	US 6.5/9 - 10/13
	CM 25.5/27 - 28/31

SJ BAMBOO SOCK

Your feet contain more sweat glands than any other part of the body. That's why we developed our high-performing and sustainable bamboo socks. Made from 77% bamboo fiber, they keep your feet dry and guarantee unparalleled comfort that lasts all day. Because even the best shoes won't deliver on their promised comfort if you don't wear the right socks.

Material	77% bamboo fiber, 3% polyamide fiber 3% spandex, 17% polyester
Sizes	EU 38/40 - 41/43 - 44/46 - 47-48
	JPN 24/25.5 - 26/27 - 28/30 - 31/31.5

HEAD PROTECTION

Don't give hazards a head start

Head-to-toe protection? We take that quite literally!

Alongside our safety footwear and workwear, we also offer head protection for every workplace.

Our range includes:

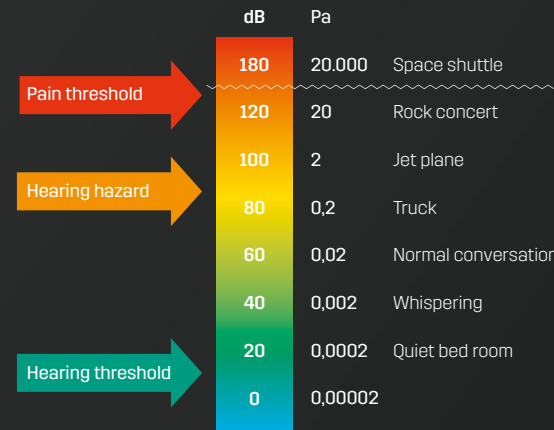

- ✓ **Helmets** to protect the head from falling objects
- ✓ **Safety glasses and goggles** to protect the eyes from particles, chemicals and high-energy light
- ✓ **Earmuffs and plugs** to protect the hearing from damaging noises
- ✓ **Respirators** to protect from harmful solid and liquid particles.

Important numbers when choosing ear protection

What is considered excessive noise?

Sound is measured in decibels (dB). But what decibel levels are safe and which sounds can damage the ear?

- ✓ **<70 dB**: safe sounds that typically don't cause any hearing damage
- ✓ **>70 dB**: sounds that may damage your hearing after a certain amount of time
- ✓ **>120 dB**: sounds that cause immediate harm to your ears

Ear protection standards

Ear protection has an SNR rating. SNR stands for single number rating and gives you an estimate of the level of noise reduction that earmuffs or plugs can provide. This means that if you are at a rock concert with a noise level of 100 dB and you are, for example, wearing our Arusha ear plugs with an SNR of 38 dB, your new level of noise exposure is 62 dB.

Important numbers when choosing **eyewear**

Optical filter & UV radiance

When choosing protective eyewear, you'll notice that the optical filter has a certain rating. For example: 2-1,2. But what does this mean?

The first number describes the type of filter:

- ✓ 2 & 3: UV filters
- ✓ 4: heat radiation filter
- ✓ 5: sun protection filter
- ✓ 6: infrared radiation filter

The second number describes the light transmission:

- ✓ 1.2: clear lens that transmits between 74,4% and 100% of visible light
- ✓ 2.2: dark lens that transmits between 29,1% and 17,8% of visible light
- ✓ The higher the number, the lower the transmission

An optical filter of 2-1.2 is a clear lens that offers UV protection. An optical filter of 5-2.5 is a dark lens that offers sun protection.

Impact resistance

Impact resistance is always tested with a steel ball of 6 mm diameter and a weight of 0,86 grams. When a lens has an **F marking**, the steel ball is fired at **45 m/s** or a speed of 162 km/h. When a lens has a **B marking**, the steel ball is fired at **120 m/s** or a speed of 432 km/h.

YEL

KANHA LIGHT

EN 397:2012+A1:2012

Light helmet that offers all-day protection and wearing comfort

Standard EN 388:2016

Gloves protecting from mechanical risks

This standard applies to all kinds of protective gloves in terms of physical and mechanical hazards caused by abrasion, blade cuts, puncturing and tearing. The level of protection against mechanical hazards is expressed by an icon followed by four numbers (performance levels), each representing the performance against a specific hazard.

The EN 388, similar to ANSI/ISEA 105, is the European standard used to evaluate mechanical risks for hand protection. Gloves with a EN 388 rating are third-party tested, and rated for abrasion, cut, tear, and puncture resistance.

EN388:2016	0	1	2	3	4	5
a. Abrasion resistance (cycles)	<100	100	500	2000	8000	-
b. Cut resistance (factor)	<1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	<10	10	25	50	75	-
d. Puncture resistance (newton)	<20	20	60	100	150	-

EN ISO 13997 (TDM-100 test)	A	B	C	D	E	F
e. Straight blade cut resistance (newton)	2	5	10	15	22	30

JOGGER**
PROFESSIONAL

PROFESSIONAL

Safety Jogger Professional is the number one solution for certified professional footwear. We offer a full range of trendy, comfortable and quality work shoes and clogs, adapted to the needs of workers in medical, uniform & catering environments.

LIGHT

APPLICATION

Light application footwear is mainly used on even and dry floors with a limited risk of contact with liquids.

MEDIUM

APPLICATION

Medium application footwear is engineered for dry and wet floors in an indoor environment.

HEAVY

APPLICATION

For our professional collection, heavy application means that this type of footwear has special features and can be worn in special areas. More specifically, these shoes and clogs meet special cleaning needs, such as being machine washable or autoclavable.

LIGHT APPLICATION

MICKEY

Work hard, play harder! Our Mickey collection is a collaboration between Safety Jogger and Disney and combines certified protection with the iconic ears of the most loved character of all times: Mickey Mouse.

PHARMAMASK

Disposable sterile surgical mask

Pharmamask is a disposable sterile surgical mask, CE certified. This product is suitable for use in a general medical environment. It is composed out of three materials: a non-woven fabric, a nose strip and an elastic band. The face mask is divided into an inner, middle and outer polypropylene fiber meltblown fabric. The nose strip is made of a galvanized metal strip.

- ✓ Adjustable nose bridge
- ✓ Comfortable & breathable
- ✓ Special 3-ply non-woven design

CE EN14683-2019 TYPE IIR BFE ≥98%

Branding & visibility

Did you know that we established various **partnerships** to boost our brand's visibility all over the world?

These partnerships will drive our joint business by:

- ✓ Increasing our media exposure
- ✓ Reaching a wider demographic and targeting new audiences
- ✓ Keeping our brand top of mind and building even more credibility
- ✓ Generating more brand visibility in-store (POS materials)
- ✓ Creating opportunities for dealer incentives (sponsorship events)
- ✓ Driving excitement, traffic and consequently sales
- ✓ ...

Ypres Rally

Safety and speed go hand in hand and so do Safety Jogger and the Ypres Rally! Three days of competition on specialist roads combined with an incredible atmosphere and famous rally pilots make Ypres Rally one of the most challenging and entertaining rallies in the world.

City Mountainbike

For several years, we have been the official partner of City Mountainbike, the organizer of the UCI Mountain Bike Eliminator World Cup and World Championships. City Mountainbike is a spectacular format that brings mountain biking to the heart of major cities on different continents.

Stijn De Jaeghere aerobatics

Safety Jogger is not only visible on the ground, but also in the air! We've known Stijn De Jaeghere for years and find the story behind his aerobatics and the dedication he has shown admirable. That's why we are delighted to support him in his flight to the top!

SUPPORTING EACH MEMBER OF THE TEAM

Did you know that we are an official partner of the Quick-Step Alpha Vinyl team since 2022? We are proud to partner up with the most successful and therefore most visible UCI cycling team in the world and to have our logo prominently displayed on the athlete's shoulders. In addition, we also support each member of the team, including 31 riders and 53 staff members, with our professional and medical footwear.

Alcatraz

Alcatraz Metal & Hard Rock Festival is an amazing international metal gathering in Kortrijk, Belgium, that takes place for 3 days and attracts over 30.000 visitors each edition. Safety Jogger supports Alcatraz by offering safety footwear and T-shirts for every volunteer or worker involved. In return, we're able to promote our rock-solid brand to a community in which we are very active.

Dealer support

Digital showroom

Can't make it to our showrooms? Walk through them virtually! Our digital showroom is an interactive and unique experience that introduces you to our complete range of products in a 100% online environment.

Safety Jogger Academy

The Safety Jogger Academy is our own e-learning platform with a series of training videos to educate anyone who sells Safety Jogger footwear. Brought to you in a fun, clear and engaging way. Level up your technical and product knowledge and sell more!

Foot Size app

The Safety Jogger Foot Size app is a tool that consumers can use to select their correct shoe size, which will avoid returns and administration and which will provide dealers with more insights into their customer base. The app can be customized to show the colors and logos of your business. Download it from the App Store or Google Play Store.

SIS

Have you already seen our shop-in-shop concept? This designated Safety Jogger sales area offers the right balance between our brand experience, density and aesthetics. It reflects our categories, but at the same time, it also reflects the flexibility that is at the heart of any retail environment.

Dealer content

Through our dealer platform - order.safetyjogger.com - you'll have access to several useful tools to support your business, such as:

A personal advertising creator

A free advertising tool to create your own advertisements and flyers in no time. Choose between an official promotion or make your own customized promotion.

Personal advertising

Create your own advertisements in a few easy steps

✔ It's this unique tool. Safety Jogger lets you create personalized advertisement campaigns. It's a completely free service that we offer to support our customers.

- Choose a template
- Insert your images
- Fill your text
- Add your company logo
- Add your company information

Send your flyer

Within a few minutes, your personalized advertisement will be available for you to send to your customers.

Choose a representation by 4 lines

Official promotion

Representative of a selected official Safety Jogger promotion campaign. All you need to do is add your personal details.

Customized promotion

Create the personal content you want to advertise, send an official promotion and add your personal details.

A marketing section

With product & lifestyle images, videos, marketing tools, technical knowledge and all the content you need to maximize your sales

In-store branding

Did you know that we offer our dealers several free POS materials? We have merchandise available with a Safety Jogger or a Quick-Step Alpha Vinyl branding to make a visible impact in your store!

A. CHEST

Measure horizontally across the widest part of the chest. Make sure the measuring tape is held straight across the back and do not pull the tape too tight.

B. WAIST

Men: measure horizontally at belly button height.

Women: measure horizontally across the narrowest part of the waist.

C. HIP

Measure horizontally across the widest part of the hips.

D. INSIDE LEG

Measure from the crotch to just below the ankle bone. Make sure the measuring tape is stretched.

E. TOTAL LENGTH

Measure the distance from the ground to the top of the head. Stand upright and do not wear shoes.
